

PRESS RELEASE – FOR IMMEDIATE RELEASE

Premier Wen Jiabao impressed with Anwell's solar plant

Singapore, 22 July 2008 - Anwell Technologies Limited (“Anwell” or “The Group”), a leading global supplier of advanced manufacturing equipment and process technologies for the optical disc, OLED and solar cell industries, is honoured to have hosted Chinese Premier Wen Jiabao at their solar equipment plant in Dongguan, China. After Mr Franky Fan, Executive Chairman and CEO introduced the development of Anwell in the solar business, Premier Wen Jiabao expressed his appreciation to the team.

Chinese Premier Wen Jiabao (right) speaking at Anwell's solar equipment plant

“Your factory brims with dynamism. Your market dominance is the result of advanced technology, high productivity and high quality. Solar panels are a key component of clean, renewable energy, which is an important direction for our power generation and energy industries. Thus, China looks to you for its building of power saving and new energy infrastructure.¹”

Chinese Premier Wen Jiabao

¹ Translated from: “你们这个工厂富有朝气，是利用高性能、高产出、高质量来占领市场的。太阳能电池是可再生能源、清洁能源发展的重要载体，也是我们电力工业、能源工业的重要方向。因此，未来中国的节能降耗、新能源建设还得依靠你们。”

Anwell Technologies Limited (Company Registration Number: 200308707W)

Registered address: 18 Cross Street, #07-03 Marsh & McLennan Centre, Singapore 048423

Business address: Units 10-15, 9/F Metro Loft, 38 Kwai Hei Street, Kwai Chung, New Territories, Hong Kong Tel: (852) 2499 9178 Fax: (852) 2499 9170

Mr Franky Fan commented on the plant visit, "We are very honoured that Premier Wen Jiabao graced our solar equipment plant with his presence. His visit has inspired us to work even harder to address China's growing need for renewable energy. We are on schedule to have our 40MW fully automatic solar equipment online by 1Q09. We won't let China down."

Anwell's Solar Plans

Anwell recently announced its intention of becoming one of the top 10 solar module producers by 2013. Anwell will complete their 40MW thin-film solar plant in 1Q2009 and will ramp up the capacity to 120MW by 2010. The Company is adopting a vertical integration strategy in the solar industry by producing both equipment and solar cell. The strategy will help Anwell maintain a critical competitiveness advantage to sustainable growth in the industry.

###

About Anwell Technologies Ltd

Anwell Technologies Ltd. ("Anwell") is a global leader in providing integrated solutions for optical disc replication business. The Group's activities include the manufacturing and sales of optical disc production lines and blank optical discs. Currently, Anwell has business relationships with over 120 optical disc manufacturers.

With the various proprietary technologies acquired since the company was founded in year 2000, Anwell has continued to study the opportunities to tap into other industries, including OLED, solar industries and etc.
