

## PRESS RELEASE

### **Dongguan Anwell wins the bid of solar R&D project of “The Guangdong-Hong Kong Key Area Emphasis Breakthrough 2008”**

**Dongguan, Guangdong (8th January 2009)** — Dongguan Anwell Digital Machinery Co., Ltd. (“Dongguan Anwell”) has succeeded in winning the bid on “Dye-sensitized Solar Light Anode Coating Equipment Research & Development”, one of the R&D projects of “The Guangdong-Hong Kong Key Area Emphasis Breakthrough 2008” for New Energy, Energy Saving and Environmental Resources Protection Technology, announced by Dongguan Science and Technology Bureau. Dongguan Anwell will be granted funds by the Dongguan Municipal Government for the related R&D project.

The related technology developed by Anwell serves as a supplement and a key development for the existing amorphous silicon thin film solar cell equipment, in a way to enhance the domestic standard of solar cell technology in China. The technology also has great significance to bring along development in the new model of thin film photovoltaic devices industry and to promote development of thin film solar cell industry.

“The Guangdong-Hong Kong Key Area Emphasis Breakthrough 2008” is launched as a co-operation between the People’s Government of Guangdong Province and the Government of the Hong Kong Special Administrative Region focusing on the pillar industries and generic technology of both regions such as Information and Communication, Equipment and Precision Manufacturing Technology, New Material, Bio-pharmaceutical and Modernization of Traditional Chinese Medicine, New Energy, Energy Saving and Environmental Resources Protection Technology and Modern Agriculture, with key technology research and development programs being established.

###

#### **About Anwell**

*Anwell Technologies Ltd. (“Anwell”) is a global leader in providing integrated solutions for optical disc replication business. The Group’s activities include the manufacturing and sales of optical disc production lines and blank optical discs. Currently, Anwell has business relationships with over 120 optical disc manufacturers.*

*With the various proprietary technologies acquired since the company was founded in year 2000, Anwell has continued to study the opportunities to tap into other industries, including OLED, solar industries and etc.*
